Section 1: Summary

Content Inventory

- **Inventory Reporting Format**
  - Nested Materials Method
  - Basic Method

- **Threshold Disclosed Per**
  - Material
  - Product

- **Threshold level**
  - 100 ppm
  - 1,000 ppm
  - Per GHS SDS
  - Other

- **Residuals/Impurities**
  - Considered in 0 of 2 Materials
  - Explanation(s) provided for Residuals/Impurities?
  - Yes

- **All Substances Above the Threshold Indicated Are:**
  - Characterized
  - Weight and role provided for all substances.

- **Screened**
  - Yes Ex/SC
  - No

- **Identified**
  - Yes Ex/SC
  - No

- **All substances disclosed by Name (Specific or Generic) and Identifier.**

Content in Descending Order of Quantity

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

**MATERIAL** | **SUBSTANCE** | **RESIDUAL OR IMPURITY** | **GREENSCREEN SCORE** | **HAZARD TYPE**
--- | --- | --- | --- | ---
GRANITE | GRANITE | NoGS | |
BIOCIMENT | | | |

Number of Greenscreen BM-4/BM3 contents ... 1
Contents highest concern GreenScreen Benchmark or List translator Score ... NoGS
Nanomaterial ... No

Inventory and Screening Notes:
This Health Product Declaration (HPD) was completed in accordance with the HPD Standard version 2.1.1, and discloses hazards associated with all substances present at or above 100 parts per million (ppm) in the finished product, along with the role and percent weight.

Volatile Organic Compound (VOC) Content
VOC Content data is not applicable for this product category.

Certifications and Compliance
See Section 3 for additional listings.
VOC emissions: Inherently non-emitting source per LEED guidelines
Multi-attribute: ILFI Declare - Red List Free

Consistency with Other Programs
Pre-checked for LEED v4 Material Ingredients Option 1 and Option 2

Third Party Verified?
- Yes
- No

Preparer: Self-Prepared
Verifier: 
Verification #: 
Screening Date: 2020-05-14
Published Date: 2021-02-23
Expiry Date: 2023-05-14
Section 2: Content in Descending Order of Quantity

This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.2, available on the HPDC website at: [www.hpd-collaborative.org/hpd-2-2-standard](http://www.hpd-collaborative.org/hpd-2-2-standard)

Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

No accessories are required for this product.

Section 5: General Notes

bioLITH tile units are grown by non-pathogenic microorganisms in ambient conditions that are fed an aqueous solution for less than 72 hours, after which the feed process stops and the material has reached industry standards of performance. Aggregate used in the material is pre-consumer recycled granite from mining practices that are too small to be used for other purposes.
MANUFACTURER INFORMATION

MANUFACTURER: Biomason
ADDRESS: PO Box 110345
Durham NC 27709, US
WEBSITE: https://www.biomason.com/

CONTACT NAME: Alyssa Holland
TITLE: Graphic Designer
PHONE: 9194733246
EMAIL: inquiry@biomason.com

The listed contact is responsible for the validity of this HPD and attests that it is accurate and complete to the best of his or her knowledge.

KEY

Hazard Types

- AQU Aquatic toxicity
- CAN Cancer
- DEV Developmental toxicity
- END Endocrine activity
- EYE Eye irritation/corrosivity
- GEN Gene mutation
- GLO Global warming
- LAN Land toxicity
- MAM Mammalian/systemic/organ toxicity
- MUL Multiple
- NEU Neurotoxicity
- NF Not found on Priority Hazard Lists
- OZ0 Ozone depletion
- PBT Persistent, bioaccumulative, and toxic
- PHY Physical hazard (flammable or reactive)
- REP Reproductive
- RES Respiratory sensitization
- SKI Skin sensitization/irritation/corrosivity
- UNK Unknown

GreenScreen (GS)

- BM-4 Benchmark 4 (prefer-safer chemical)
- BM-3 Benchmark 3 (use but still opportunity for improvement)
- BM-2 Benchmark 2 (use but search for safer substitutes)
- BM-1 Benchmark 1 (avoid - chemical of high concern)
- BM-U Benchmark Unspecified (due to insufficient data)
- LT-P1 List Translator Possible 1 (Possible Benchmark-1)
- LT-1 List Translator 1 (Likely Benchmark-1)
- LT-UNK List Translator Benchmark Unknown (the chemical is present on at least one GreenScreen Specified List, but the information contained within the list did not result in a clear mapping to a LT-1 or LT1P score.)
- NoGS No GreenScreen.

Recycled Types

- PreC Pre-consumer recycled content
- PostC Post-consumer recycled content
- UNK Inclusion of recycled content is unknown
- None Does not include recycled content

Other Terms:

- GHS SDS Globally Harmonized System of Classification and Labeling of Chemicals Safety Data Sheet

Inventory Methods:

- Nested Method / Material Threshold Substances listed within each material per threshold indicated per material
- Nested Method / Product Threshold Substances listed within each material per threshold indicated per product
- Basic Method / Product Threshold Substances listed individually per threshold indicated per product

Nano Composed of nano scale particles or nanotechnology

Third Party Verified Verification by independent certifier approved by HPDC

Preparer Third party preparer, if not self-prepared by manufacturer

Applicable facilities Manufacturing sites to which testing applies

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
