Glass Mineral Wool Blowing Insulation

Knauf Insulation Jet Stream® ULTRA Glass Mineral Wool Blowing Insulation is an unbonded, virgin fibrous glass blowing insulation designed with optimal thermal properties and excellent coverage and blowing characteristics.

- **ULTRA**-performance in attics and sidewalls. Never settles.
- **ULTRA**-convenient. One product, one inventory, two applications.
- **ULTRA**-sustainable. Has a high degree of recycled content.
- **ULTRA**-fast, **ULTRA**-easy installation.
Knauf Insulation Jet Stream ULTRA Glass Mineral Wool Blowing Insulation is installed in open attics of both new and existing structures and/or in closed cavity applications with the BIBS system (Blow-in-Blanket System). Jet Stream ULTRA, when used in closed cavity applications is BIBS approved and can only be installed by BIBS certified installers to ensure the highest quality installed performance.

FEATURES AND BENEFITS

Excellent Thermal Performance
- Fills all gaps and voids, creating a thermal barrier against outside air and better temperature control.
- Resists heat flow with an R-value of
  - R-15 in 2 x 4 construction
  - R-23 in 2 x 6 construction

Convenient
- One product, one inventory, two applications.

Energy Conservation
- Reduces fuel usage and utility bills for heating and air conditioning.

Sustainable
- Has a high degree of recycled content.

Noise Reduction
- Improves Sound Transmission Class (STC) ratings by 4 to 10 points.

Installation
- Blows fast and smooth.

Permanence
- Non-combustible, non-corrosive.
- Will not rot, mildew or deteriorate.

THERMAL PERFORMANCE

Jet Stream ULTRA Blowing Insulation provides you with a choice of R-values based on the installed thickness and installed weight per square foot. The tables to the right show the minimum requirements for obtaining the desired R-value.

The stated thermal resistance (R-value) is provided by installing the required number of bags per 1,000 sq. ft. of net area, at not less than the labeled minimum thickness (per the manufacturer’s instructions). Failure to install both the required number of bags and at least the minimum thickness will result in lower insulation R-values.

Field blending of this product with other loose fill insulation or application of this product in conjunction with adhesive or binder systems may affect its thermal performance and is not recommended by the manufacturer.

Framing Adjustments
As shown in the table on the last page, to compensate for the framing members in open attic applications, the number of bags per 1,000 sq. ft. of area.

SPECIFICATION COMPLIANCE
- ASTM C764; Type I
- HHI-1030B; Class B
- Certified to GREENGUARD standards
- GREENGUARD Gold Certification and verified to be formaldehyde free.

Jet Stream ULTRA Glass Mineral Wool Blowing Insulation is manufactured with a high degree of recycled content and UL Environment verification every 6 months.

TECHNICAL DATA

Surface Burning Characteristics
- Does not exceed 25 Flame Spread, .50 Smoke Developed when tested in accordance with ASTM E84 and CAN 4-S102.2.

Critical Radiant Flux (ASTM E970)
- Greater than 0.12 W/cm².

Moisture Vapor Sorption (ASTM C1104)
- 5% maximum by weight.

Corrosion (ASTM C764)
- No greater than sterile cotton.

Microbial Growth (ASTM C1338)
- Does not support microbial growth.

Non-Combustibility (ASTM E136)
- No temperature rise above 54°F (30°C).

Equipment Required
To achieve labeled R-value, this product must be applied with a pneumatic blowing machine and a corrugated hose with a minimum ¼" internal corrugation, a minimum length of 150' and a diameter of at least 3". Coils in the hose should not be less than 36" in diameter. Acceptable material feed rate is 5-35 lbs./minute. The recommended feed rate is 15-25 lbs./minute. For closed cavity applications, netting must be applied.

Packaging
- Jet Stream ULTRA Blowing Insulation is packaged in a strong, white poly bag that offers excellent protection from abuse, dust and moisture.
- Knauf Insulation packages are lightweight, stack without slipping and are easy to handle and store.
Bag Net Weight - Nominal 32 lbs., Minimum 31 lbs.

Coverage and installation data were determined using a Volu-Matic® II blowing machine in third gear with 13" gate opening, 2.0 psi air pressure, 150' of 3" diameter internally-corrugated hose.

* "R" means resistance to heat flow. The higher the R-value, the greater the insulating power. To get the marked R-value, it is essential that this insulation be installed properly. If you do it yourself, get instructions and follow them carefully. Instructions do not come with this package.

** Based on Third Party 2-year settlement study, the predicted settlement over a 20-year period would be 1 percent or less. This amount of settling is thermally insignificant. Therefore, the installed and settled thicknesses are effectively the same.

Volu-Matic® II is a registered trademark of Unisul.

Insulating attics with Jet Stream® ULTRA gives homes better thermal performance, reducing fuel usage and utility bills.

Notes

The chemical and physical properties of Knauf Insulation Jet Stream® ULTRA Blowing Insulation represent typical average values determined in accordance with accepted test methods. The data is supplied as technical service and is subject to change without notice. References to numerical flame spread ratings are not intended to reflect hazards presented by these or any other materials under actual fire conditions.

Check with your Knauf Insulation territory manager to assure information is current.
LEED Eligible Product
Use of this product may help building projects meet green building standards as set by the Leadership in Energy and Environmental Design (LEED) Green Building Rating System.

LEED v2009
- MR Credit 4.1 - 4.2 Recycled Content
- MR Credit 5.1 - 5.2 Regional Materials

LEED v4
Knauf Insulation offers several products for both envelope and mechanical systems that have ingredient disclosure and transparency. Please contact transparency@knaufinsulation.com for products that currently contribute to MR credits.

UL Environment GREENGUARD Gold™
Knauf Insulation building insulation achieved UL Environment GREENGUARD Gold and is UL Environment validated to be formaldehyde free.

UL Environment GREENGUARD Certification Program™
Products are certified to UL Environment GREENGUARD standards for low chemical emissions into indoor air during product usage. For more information, visit ul.com/gg.

Declare.
Declare is a voluntary self-disclosure program aiming to transform the building materials industry towards healthier and more ecological products through ingredient transparency.

Participating in Declare means this product has voluntarily self-disclosed all ingredients in order to promote transparency.

Living Building Challenge Compliant means this product meets the requirements of the Red List Imperative of the Living Building Challenge due to a temporary exception.

Living Building Challenge Red List Free means this product does not contain any ingredients on the Living Building Challenge’s Red List.
