Match Point  ColorBody™ Porcelain

Field Tile

PURE WHITE UNPOLISHED P125
Field Tile
Pre-Consumer: 0.0%
Post-Consumer: 0.0%
Origin: China

IVORY WHITE POLISHED P127
Field Tile
Pre-Consumer: 0.0%
Post-Consumer: 0.0%
Origin: China

TWILIGHT BLACK POLISHED P126
Field Tile
Pre-Consumer: 0.0%
Post-Consumer: 0.0%
Origin: China

JET BLACK UNPOLISHED P124
Field Tile
Pre-Consumer: 0.0%
Post-Consumer: 0.0%
Origin: China

Description

Notes:

- The color saturation of this product is affected by the surface finish. The unpolished and polished finish coordinate but are not an exact match in color tone.

Product Information

Tile Thickness:
3/8"
Relative Pricing:
High

Grout Joint Recommendation:
1/8" (3/16" when rectangular sizes are used in a staggered brick-joint pattern where the overlap does not exceed 33%)

Shade Variation:
Medium (V2)

Dynamic C.O.F. (Wet) value as measured by the DCOF AcuTest™ helps to assess a product's suitability for a commercial environment. [Read information on D.C.O.F.](#)

Manufacturers Warning:

- These tiles have a dynamic coefficient of friction less than 0.42 as measured by the DCOF Acutest™ method. Tiles with DCOF Acutest values less than .42 are not recommended for use in areas with wet or slippery conditions. If such tiles are used as a walking surface where water, ice, oil, grease and/or other substances are present, such a condition could cause a reduction in foot traction and become unexpectedly slippery resulting in a fall and personal injury. See ANSI standard A137.1 section 6.2.2.1.10, available at [www.tcnatile.com/section6.2.2.1.10.html](http://www.tcnatile.com/section6.2.2.1.10.html).
- Water, oil, grease, etc. create slippery conditions. Floor applications with exposure to these conditions require extra caution in product selection. Not for use on ramps.
- For additional information, refer to [Factors to Consider](#).
- Since there is a shade variation on all natural products, the tile and trim supplied for your particular installation may not match these samples. Final selection should be made from actual tiles and trim and not from tile and trim samples or color reproductions. Manufactured in accordance with ANSI A137.1 standards.

Applications

</table>
Notes:

- Residential unpolished surfaces are suitable for exterior floors and walls in freezing and non-freezing climates when proper installation methods are followed.

- Residential polished surfaces are suitable for exterior walls in freezing and non-freezing climates when proper installation methods are followed.

- Commercial usage is suitable for exterior walls in freezing and non-freezing climates when proper installation methods are followed.

- Polished surface is only suitable for Dry & Level floor applications.
